

ISSUED: 19 February 2018

SAFETY DATA SHEET

Section 1: IDENTIFICATION of CHEMICAL PRODUCT and COMPANY

Product Name:	RSPCA Medicated Shampoo for Dogs and Cats
Recommended Use:	Topical keratolytic, antibacterial, antifungal and antipruritic shampoo for dogs and cats.
Company Identification:	Indyvet Animal Health Products Pty Ltd
Address:	5/42 Owen Creek Rd, Forest Glen, Qld 4556
Customer Centre:	1300 463 983
National Poisons Information Centre:	131126 (Australia-wide)
Emergency Telephone Number:	1300 463 983 (9am-5pm, Monday to Friday)

Section 2: HAZARDS IDENTIFICATION

Hazard Classification: Category 5 – Acute toxicity, Oral
Category 1 – Sensitisation, Skin / Serious eye damage/eye irritation / Sensitisation, respiratory

Hazard Statements: May be harmful if swallowed, May cause an allergic skin reaction, Causes Serious eye damage, May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Signal Word: Danger

GHS Pictograms: None

Precautionary statements: Avoid breathing vapor, Contaminated work clothing should not be allowed out of the work place, Wear protective (non-latex) gloves and eye protection/face protection.

Section 3: COMPOSITION / INFORMATION on INGREDIENTS

Ingredients	CAS No	Conc,%	TWA (mg/m3)	STEL (mg/m3)
Chlorhexidine Gluconate	18472-51-0	less than 10	not set	not set
Miconazole Nitrate	22832-87-7	less than 10	not set	not set
Other non hazardous surfactants	secret	less than 30	not set	not set

This is a commercial product whose exact ratio of components may vary slightly. Minor quantities of other non hazardous ingredients are also possible.

Section 4: FIRST AID MEASURES

General Information:

You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 131126 from anywhere in Australia and is available at all times. Have this SDS with you when you call.

Inhalation: If inhaled remove from contaminated area. Other measures are usually unnecessary. If respiratory symptoms become evident, contact a Poisons Information Centre, or call a doctor at once. Remove source of contamination or move victim to fresh air. If breathing is difficult, oxygen may be beneficial if administered by trained personnel, preferably on a doctor's advice. DO NOT allow victim to move about unnecessarily.

Skin Contact: Wash gently and thoroughly with warm water (use non-abrasive soap if necessary) for 10-20 minutes or until product is removed. Under running water, remove contaminated clothing, shoes and leather goods (e.g. watchbands and belts) and completely decontaminate them before reuse or discard. If irritation persists, repeat flushing and seek medical attention.

Eye Contact: Immediately flush the contaminated eye(s) with lukewarm, gently flowing water for 20 minutes or until the product is removed, while holding the eyelid(s) open. Take care not to rinse contaminated water into the unaffected eye or onto the face. Obtain medical attention immediately. Take special care if exposed person is wearing contact lenses.

Ingestion: If swallowed, do NOT induce vomiting. Wash mouth with water and contact a Poisons Information Centre, or call a doctor.

Exposure: Chlohexidine Gluconate has been reported as causative agent of contact dermatitis, hives (urticaria), shortness of breath (dyspnoea) and anaphylactic shock. Miconazole Nitrate by ingestion: anorexia, nausea, vomiting and diarrhoea. Local irritation reactions and potentially hyperlipidaemia, drowsiness, febrile reactions, hyponatraemia, acute psychosis, arthralgia and anaphylaxis.

Section 5: FIRE FIGHTING MEASURES

Flash point: Not established

Extinguishing media: No restriction on type of extinguisher. Use what is appropriate to soundings fire conditions.

Flammable: Not flammable

Section 6: ACCIDENTAL RELEASE MEASURES

Accidental release: This product is sold in small packages, and the accidental release from one of these is not usually a cause for concern. For minor spills, clean up, rinsing to sewer and put empty container in garbage. Although no special protective clothing is normally necessary because of occasional minor contact with this product, it is good practice to wear impermeable gloves when handling chemical products. In the event of a major spill, prevent spillage from entering drains or water courses and call emergency services.

Section 7: HANDLING AND STORAGE

Handling: Avoid contact with eyes and skin.

Storage: Store below 30°C (Room Temperature). Keep out of reach from children.

Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Eye Protection: Protective glasses or goggles should be worn when this product is being handled in bulk. Failure to protect your eyes may cause them harm. Emergency eye wash facilities are also recommended in an area close to where this product is being used.

Skin Protection: Prevent skin contact by wearing impervious gloves, clothes and, preferably, apron. Make sure that all skin areas are covered. See below for suitable material types.

Respirator: Usually, no respirator is necessary for normal use of this product.

Engineering controls: Ensure running water and adequate ventilation.

Section 9: PHYSICAL AND CHEMICAL PROPERTIES

Physical Description & colour:	Colourless to pale yellow transparent fluid
Odour:	Distinctive
Boiling Point:	~100°C.
Freezing/Melting Point:	~0°C.
Volatiles:	No specific data.
Vapour Pressure:	No data
Relative Density:	1.030 -1.070g/mL
Viscosity:	500-1,500cPs
Water Solubility:	Soluble.
pH:	No data.
Volatility:	No data.
Evaporation Rate:	No data.

Section 10: STABILITY AND REACTIVITY

Reactivity: This product is unlikely to react or decompose under normal storage conditions. However, if you have any doubts, contact the supplier for advice on shelf life properties. Miconazole nitrate may react with latex.

Chemical Stability: Formulated to be stable as supplied.

Conditions to Avoid: Store in the closed original container in a dry, cool area and out of direct sunlight. Do not freeze or store in damp areas or with strong chemicals.

Incompatible Materials: Oxidising products, anionic surfactants.

Hazardous decomposition: With prolonged storage, generally beyond product expiry date, Chlorhexidine Gluconate will degrade into p-chloroaniline (PCA), a category 2 carcinogen, accelerated by low pH and high temperatures. The breakdown product is readily absorbed by the skin and rapidly absorbed in the GI tract. It is then widely distributed throughout the body including to the muscle, fat, skin, blood, liver, spleen and kidneys.

Section 11: TOXICOLOGICAL INFORMATION

Toxicity:

Ingestion: No data is available for this product. Not intended for ingestion. Based on the data for the ingredients this mixture is not considered to be acutely toxic by the ingestion route and under normal condition ingestion is unlikely to occur.

Inhalation: No data is available for this product. Based on the data for the ingredients this mixture is not considered to be acutely toxic by the inhalation route and under normal condition inhalation is unlikely to occur.

Dermal: No data is available for this product. Based on the data for the ingredients this mixture is not considered to be acutely toxic by the dermal route.

Section 12: ECOLOGICAL INFORMATION

Ecotoxicity: Toxic to aquatic life

Persistence and Biodegradability: Some surfactants are biodegradable, however actives are not.

Other adverse effects: No data

Section 13: DISPOSAL INFORMATION

Disposal: Dispose of empty container by wrapping with paper and placing in garbage. Do not let large volumes run into waterways.

Section 14: TRANSPORT INFORMATION

This product is not classified as a Dangerous Good. No special transport conditions are necessary unless required by other regulations.

Section 15: REGULATORY INFORMATION

Schedule : s6

NICNAS: Several ingredients have been classified and reviewed at IMAP T2.

Section 16: OTHER INFORMATION

This information is based on data believed by Indynet Animal Health Products Pty Ltd to be accurate at the time of writing but is subject to change without notice. It is given in good faith, but no warranty expressed or implied is made as to its accuracy, completeness otherwise and no assumption of liability from howsoever arising is made by Indynet Animal Health Products Pty Ltd by reason of the provision of this information. Every person dealing with the materials referred to herein does so at his/her own risk absolutely and must make independent determinations of suitability and completeness of information from all sources to ensure their proper use.

Legend:

ADG Code	Australian Code for the Transport of Dangerous Goods by Road and Rail (7 th edition)
AICS	Australian Inventory of Chemical Substances
SWA	Safe Work Australia, formerly ASCC and NOHSC
CAS number	Chemical Abstracts Service Registry Number
GHS	Global Harmonised System (safety symbols and labelling)
Hazchem Code	Emergency action code of numbers and letters that provide information to emergency services especially firefighters
IARC	International Agency for Research on Cancer
NOS	Not otherwise specified
NTP	National Toxicology Program (USA)
R-Phrase	Risk Phrase
SUSMP	Standard for the Uniform Scheduling of Medicines & Poisons
UN Number	United Nations Number

This version issued: 19 February 2018 and is valid for 5 years from this date.
